

Client: BP America

Site: BP Naperville Campus / Site Redevelopment Project 3, \$3 million

Contact: Scott Maish, MBA, PE, LEED AP, Project Manager / (720) 554-8234

Year: 2010-2011

As the Program Manager, Shaw Environmental & Infrastructure Group selected Rose Paving Company to lead the Phase 3 civil site reconstruction efforts at the BP Naperville Campus. Rose Paving constructed the new West Gate Road and Guardhouse which provides safe and secure site access, creates additional area for the expansion of the Building 300 parking lot and reduces the pedestrian traffic that previously crossed a major traffic artery. Rose Paving also constructed a wilderness area and pedestrian corridor, which is a landscape of regenerative systems and resources benefiting human health, ecology, and environmental stewardship. Rose Paving completed these elements by managing and executing the construction of the following tasks: survey layout, materials testing, erosion control, tree removal, mass earthwork, storm sewer, concrete curb and gutter, foundations and sidewalk, limestone nature trail, landscaping, asphalt, and pavement striping.
