

Client: Coventry Health Care

Site: Downers Grove, IL, \$0.5 million

Contact: David Olsen / (630) 963-7585

Year: 2010

Coventry Health Care is located in Downers Grove, IL. In August of 2010 Rose Paving was selected by Inspec Inc. to perform an extensive parking lot renovation at the Coventry Facility. In large part, Rose Paving was awarded the 153,900-square foot project due to the client's need for full time on-site Project Management. Of great importance to the customer was the ability to maintain the ease of access as well as the safety of the nearly 200 employees who occupy the building on a daily basis. This project was performed in three phases and included full depth patching, perforated under drain installation, the installation of storm water retention structure, underlayment stabilization fabric installation, integral concrete curb and sidewalk installation, and a complete resurfacing of the entire parking lot. Despite multiple days of inclement weather, this project was completed on time and within budget.
